Summer is Almost Half Over!

I know it's hard to believe but the next school year is not that far away. If your budgets are approved and you are looking for any facility upgrades we can help. Our current scoreboard production time is 5 weeks so if you order by July 19 we can get it to you before school begins. If you haven't checked your boards to make sure everything is working it might be a good time to do that. If you need parts, digits or a new ID panel we can help. Take a look at our scoreboard gallery [here](#) and [here](#).

If you are looking to brand your facility with windscreens we can do that also. We supply both [Aer-Flo Tuffy windscreens](#) and [Cover Sports windscreens](#).

We have also added a new service. We can now assist you with a unique addition to your performance training. We are now representatives for [SmartFit training products](#). Please click through to their website and give me a call at 856-3818888 or send an e-mail to ed@htsvtraining.com with questions.

Thanks for reading and enjoy your summer!

Scoreboard Accessories and Parts

Control The On-Field Scoreboard With Your Mobile Device

Single Score Converters

If you are having difficulties with your scoreboard it might be something as simple as a bad communication system between your controls and the scoreboard. Take a look at the [SingleScore](#) and call me at 856-381-8888 or e-mail ed@htsvtraining.com for a quote.

With a SingleScore converter and a mobile device running the SingleScore app, scoring a game has never been easier. An intuitive interface that looks like the scoreboard you are controlling will get you up to speed quickly. The SingleScore app is currently available for Baseball, Football, Basketball, Hockey, and Soccer scoring. Sport specific scoring enables quicker, more accurate scoring. Running on a mobile device means fewer buttons to push, and no more resetting the board in the middle of a game to correct a mistake. Tap or swipe to update the scoreboard, it's that easy.

Want to share game status. SingleScore offers an embeddable widget that you can add to your website. Now fans anywhere can follow the progress of the game - as its happening. Create a virtual scoreboard and see for yourself.

Whether you're looking for a replacement for your current controller or console, trying to make scoring easier for your scorekeepers, or allow fans to keep up with the action, a SingleScore converter can help. Get a SingleScore converter today.

SingleScore converters are compatible with over a 150 models of Electro-Mech scoreboards, and many Fair-Play scoreboards, including wired and wireless models. We also support wired Daktronics scoreboards. SingleScore converters interface with the scoreboards and the correct version must be purchased to match the Scoreboard you wish to control. If you don't see your scoreboard model in the list, please contact us at ed@htsvtraining.com so we can confirm that SingleScore is compatible with your scoreboard.
